

Emo Labs Moves Headquarters to Waltham, MA

Developer of invisible speaker systems expands product development efforts

April 15, 2007, Waltham, MA – Emo Labs, Inc., the developer of invisible speaker systems, announced today that it has moved its headquarters office to a new location in Waltham, Massachusetts. The building at 186 Third Avenue in Waltham gives the growing company significant room to expand. In addition to more office space and additional conference rooms, the new facility includes two Advanced Acoustics Labs, a larger space for prototype manufacturing, and room for test chambers.

Emo Labs' CEO, Jason L. Carlson, said of the new space "This move gives us a terrific location with plenty of room to grow. We now have the kind of facilities needed to support our growing team and expanded product development initiatives. It is also easier to get to our offices from Boston's Logan International Airport and most of our employees are benefitting from a shorter commute."

Founded in 2005 in West Newton, Massachusetts, Emo Labs develops embedded audio solutions for leading electronics manufacturers that "disappear" into the display enclosure. Emo Labs' state-of-the-art *Edge Motion™* speaker systems offer several significant benefits over conventional speakers.

The Company's move to new office space was required to accommodate the rapid growth of its employee base and the need for expanded manufacturing and test facilities. Emo Labs continues to add personnel in the areas of engineering, testing and manufacturing.

Effective immediately, the company's new address and phone number are:

Emo Labs, Inc.
186 Third Avenue
Waltham, MA 02451
